

# Quality Assurance Manager

## Job description

As quality assurance manager you will be working in the quality team where you are responsible for the maintenance of the Quality Management System, certification and audit system. You support the increase of quality mindset in the company.

### Your responsibilities are:

- Assist with expanding the current Quality System towards ISO 9001, ISO 13485 and ISO 27001.
- Training and motivating personnel in the use of the QS.
- Continuously review the documented processes to keep them aligned with the actual needs.
- Report on progress.

### Your team

You will be part of the quality and support team of LioniX international. This team's responsibility is to facilitate and organize all that is needed to let the company run smoothly. The implementation of ISO 13485 as well as setting up production in a CE certified manner are current topics for this team. Both activities will need significant attention after the initial installation.

### Professional requirements

- Bachelor's degree with experience in the field
- Team worker in multidisciplinary setting
- Ability to gather and analyze data
- Ability to develop and review processes
- Experience with CE certification is a pre

### Languages

- Fluent in English
- Fluent in Dutch

## What LioniX International offers you

- Competitive salary
- Good terms of employment
- Company paid pension plan
- Company paid insurances
- Healthy work – life balance
- International working environment

- Contract for 0.8 FTE (32 hours) to 1 FTE (40 hours)

Working at LioniX International means you will be working in a dynamic and inspiring environment. As a technology driven company our teams are always curious and looking for challenges and possibilities. Your team expects you to work as a team player, but individually you will have many possibilities for self-deployment. This is stimulated actively since it is of great importance for LioniX International that we invest in a long term relationship between us and you.

As a global leader in microsystem technology, your working environment will be both Dutch and international. Your colleagues and the projects you are working on both have a diverse nationality.

When joining the LioniX family, you will experience that we also create many opportunities for non-work related matters, such as Friday afternoon celebrations and days-out with the company. Last but not least, LioniX International has good terms of employment including an excellent pension and insurance plan both for you and your family.

## **Company profile**

LioniX International is a leading global provider of customized microsystem solutions, in particular integrated photonics-based, in scalable production volumes. We provide customized solutions for OEM's and system Integrators, by vertical integration, from design to fully assembled modules. We continuously maintain our technology leadership secured in a strong IP position. Currently LioniX International employs nearly 50 highly educated people, and its management has multiple decades of combined experience in micro/nano system technology.
